Skills

Scripting Languages - JavaScript | Python

Tech - React | Next.js | Node | MongoDB | GraphQL | HTML5 | CSS3 | Git

Projects

500 Tales - MongoDB | GraphQL | Apollo | Next.js

500 Tales is a social media web app dedicated to short fiction. It provides a clean and intuitive platform for users to share their work and connect with other users. Its features include:
- Following other users.
- A customized feed with the posts of the users you follow.
- A discovery section to find new users to follow along with their work.
- The ability to like and comment on different pieces of fiction.
- Filtering posts by likes, views, and date of creation

Productivia - React | Firebase | Redux Toolkit

Productivia is a web app focused on providing the user with the tools needed to maximize productivity, such as flashcards, pomodoro clocks, and todo lists.
